Health and Care Experience Survey 2013/14

Kinglass Medical Practice - Bo'ness

This report gives a summary of the results of the Health and Care Experience Survey 2013/14 for Kinglass Medical Practice - Bo'ness.

The survey was sent to 547 people registered with the practice.

The survey asked questions about people's experiences during 2013/14 of making an appointment; visiting the GP practice; seeing staff; being prescribed medicines; out of hours healthcare; other care services; and being a carer. A copy of the survey is available at:

http://www.healthcareexperienceresults.org/gp/GP_Survey_2013.pdf

112 patients of Kinglass Medical Practice - Bo'ness sent in feedback on their experiences at the practice. Of the patients that answered questions about themselves:

- 58% were male and 42% were female;
- 6% were aged 17-34, 20% were aged 35-49, 33% were aged 50-64 and 40% were 65 and over;
- 68% did not have any limiting illness or disability.

The survey was commissioned by the Scottish Government as part of the Scottish Care Experience Survey Programme, which aims to use the public's experiences of health and care services to improve those services. The survey was managed by the Scottish Government in partnership with Information Services Division (ISD) of NHS National Services Scotland. The survey was carried out by the Picker Institute Europe, a charity which provides support for care experience surveys.

The results of the survey will be used by GP practices, Health Boards, Community Health Partnerships and the Scottish Government to improve the quality of health and care services in Scotland.

Results for some questions may be suppressed due to low number of responses. These are typically the questions relating to social care services and caring. Results for such questions can be found in the relevant CHP/Board Report

National results for this survey and further details on the methods used to generate this report are available at:

<http://www.scotland.gov.uk/Topics/Statistics/Browse/Health/GPPatientExperienceSurvey>

Notes on Interpretation

Results are shown as the percentage of patients who answered each question positively.

The bars illustrate the % positive as green (darker green being very positive and lighter green being positive), and the % negative as red. Where answers are neither positive nor negative, the % is shown in yellow.

The answers that have been counted as positive and negative for each question can be found at:

http://www.healthcareexperienceresults.org/gp/Percent_Positive_Results_key_2013.pdf.

The difference between the practice percent positive result and the Scottish average and, where possible last year's result is shown in the final columns. Differences which are statistically significant are shown as follows:

-  Percent positive score significantly higher than Scottish average
-  Percent positive score significantly lower than Scottish average

Later in this report we compare the latest results with those from previous surveys and present results for questions that do not fit into the 'percentage positive' format.

Please note: If an expected question does not appear within this section it is because it has been suppressed due to low number of responses. If you wish to see results for such questions, please refer to the relevant CHP/Board Report.
